# Product Introduction

Wondershare PPT2DVD is the first program that empowers users easily to convert existing PowerPoint presentations to dynamic DVD movies. The final output will retain all subtleties from the original presentation. Besides, users are allowed to create eye-catching DVD menus for easy and quick navigation.

## Why burn a PowerPoint presentation to DVD?

After converting PowerPoint to DVD, a MS Office installed computer is not necessary for playback any more, only a DVD player will handle it.

**Cost effective**

PowerPoint is powerful for creating engaging presentations but not easy for wide sharing, DVD is a ubiquitous medium, which is supported by most computers and players.

**Easy for sharing**

By burning PowerPoint to DVD, your presentations will live for more than 50 years! DVD is ideal for long-term preservation, while a hard disk will die in 10 years.

**Long time preservation**

After converting PowerPoint to DVD, you can give your presentation to your audience without worrying about it being modified by them.

**High security**

## In Business

Over **1,000,000** people  
Around the world are using  
Our products!

PowerPoint penetrates in all kinds of business activities. It helps business people or organizations improve the efficiency of their work. PowerPoint is often used in:

- Preparing meetings
- Creating trade shows
- Making video advertisements
- Doing project review presentations

By converting your PowerPoint presentations to DVD, it is possible to show the presentations conveniently and effectively. Let your activities unbound from the computer and make them reach more people. Besides, creating video advertisement with PowerPoint is much more cost-effective than asking a third-party company to do that.

Wondershare

“

*I purchased your product PPT2DVD last month, what I want to say is it's really an absolutely great addition to PowerPoint. Installed well on Vista with Microsoft Office 2007/ PPT and is fun to play with. Convenient to make business shows for exhibition.*

”

## In Education

Wondershare

PowerPoint plays a more and more important role in making courseware. Teachers always take much effort in preparing it. In order to be shared conveniently with colleagues and students, converting PowerPoint to DVD will be a good choice.

After burning PowerPoint to a DVD disc, you no longer need to worry about your courseware being modified by others and whether the people who want to get it have MS Office installed or not. You can also present your courseware on a big screen in front of mountainous audience or podcast it on video websites.

“

*I want to let you all know that I am more than pleased for your help and pleased to be one of your customers. It is companies like yours that make a difference in the computer world. Great programs, tech support and customer service.*

”

-- Ernest Lombard

## In Celebration

Are you making a presentation for the coming celebration with PowerPoint? Do you want your slide show to be played on a big screen with a DVD machine? By converting the PowerPoint to DVD all these would be realized easily. Keep all the memories in mind forever.

## In Making Photo Album

Every now and then, you may have valuable photos with your families and friends. Are you trying to create a photo album with PowerPoint and store it in a permanent way? Burn your PowerPoint to DVD, and enjoy it with them on TV. Send everybody a copy and preserve the precious time.

## Why Choose Wondershare PPT2DVD?

In 2004, Wondershare released the world's first program that is specially designed for directly burning PowerPoint presentations to DVD without computer expertise. In the past 4 years, Wondershare PPT2DVD has built positive reputation for the excellent quality both in functionality and service.

## Feature Highlights of Wondershare PPT2DVD:

1. Flexible output formats: DVD, WMV, AVI and MPEG;
2. Create a dynamic movie instead of a static slideshow;
3. Retains animations, sounds, videos and internal links;
4. Create eye-catching DVD menus with ease;
5. Batch conversion for up to 12 presentations at once;
6. Burn PowerPoint to DVD without attendance;
7. Intuitive and easy-to-use user interface;
8. Compatible with PowerPoint 2007 and Vista.
